

Major Phases in any SDC

- Requirements Elicitation
- Analysis (Planning)
- Design
- Implementation
- Testing
- Maintenance

Why (not) Agile?

- Combination of Prototyping, Spiral and Incremental models
- Support for ever-changing requirements
- Meaningful software development in 2019
- Use of modern tools wherever possible
- Support for CI/CD, VCS for faster development
- Amalgamation with DevOps allows seeking industry best practices
